Quiz No. 1 Database Systems BSE-4A/4B

Dr. Rab Nawaz Jadoon [CLO-1]

1. A collection of r	aw facts and figure is	called:	
a. Data	b. Information	c. Processing	d. None
2. The manipulated	d and processed data is		u. None
a. Object	b. Information	c. Data	d. None
3. Manipulation of		quired objectives and result i	u. None
a. Data processin	g h Oper	ration c. Both a and b	d. None
4. A person's accou	nt, car, and house are	considered:	d. None
a. Object	b. Table	c. Data processing	d. None
5. A collection of re		c. Data processing	u. None
a. File	b. Record	c. Database	d. None
6. All records in a f		c. Database	a. None
a. Contents		c. Both a and b	d. None
7. A collection of da		ne, address and email of a per	reon is called:
a. Byte	b. Record	c. Character	d. Field
8. A record in a data			u. Fleiu
a. person	b. Product	c. Event	d. All
9. Each item of infor			u. All
a. File	b. Field	c. Both a and b	d. Byte
10. A logical groupin	g of characters is a:		a. byte
a. Field	b. Record	c. File	d. All
11. A field is to a reco	ord as:		u. All
a. Data are to files		o. A column is to a row	
c. Files are to table		d. Attributes are to columns	
		lass would store basic data of	of atudanta !
a. Record	c. Field	d. Cell	
		lass would store RollNo of a	d. File
a. Record	b. Field	d. Cell	
The state of the s		a class would store the i	d. File
individual student	s in:	a class would store the i	information of
a. Record	c. Field	d. Cell	1 1722
		d. Cell	d. File

15. Which of the following is also known as data	setr						
a. Record b. Field	c. File d. All						
16. A set of related files created and managed by	a (DBMS) is called:						
a. Field b. Record	c. Database d. None						
17. Which of the following is an example of a database?							
a. Phone book b. Library catalog	c. Student records d. All						
18. SQL is a(n):	All the land of th						
a. Unstructured language b. Structured	Language						
c. Object oriented language d. Software							
19. SQL stands for:							
	fring Language						
	fying-Language						
c. Seek-Qualify-Label d. None							
20. SQL can be used to:							
a. Create database structures only	b. Query database data only						
c. Modify database data only	d. All						
21. A database is an organized collection of							
a. Logically b. Physically	c. Loosely d. Badly						
22. The objectives of database management syst							
a. Database Integrity b. Data Integration	c. Availability d. All						
23. Information sharing means that:							
a. Information can be stored once and retrieved any number of times.							
b. The same information can be shared by diff	erent applications.						
c. Both a and b							
d. Neither a nor b							
24. Which of the following is handled by DBMS	3?						
a. Data integrity b. Data security c. Data independence d. All							
25. A program whose job is to store and retrieve	user data in the database is called:						
a. Database Modeling System b. Da							
c. Data Business Model System d. Data Business Management Service							
26. The database system is composed of four major parts:							
a. Hardware, Hard drive, Monitor, Data, User							
b. Hardware, Software, People and Data.							
c. Software, You, Me, DBA, Client							
d. DBMS, Hardware, User, Programmer, Engi	neer						
27. In a database processing system:							
a. The database application(s) interact with th							
b. The database application(s) access the database	base data						
c. The DBMS accesses the database data							
d. a and c							
28. Data that causes inconsistency lacks:							
	ta redundancy d. Data anomaly						
29. Which one of the following is an advantage of database management approach?							
a. Programs are independent of the data format.							
b. Reduced security and control of the data.							
c. Increased duplication of data. d. Al							

Solution Key

	Answers					
. 1. a	2. b	3. с	4. a	5. b	6. h	
7. b	8. d	9. b	10. a	11. b	12 d	
13. b	14. a	15. c	16. c	17. d	18. b	
19. d	20. d	21. a	22. d	23. с	24. d	
25. b	26. b	27. d	28. b	29. a	30 h
